

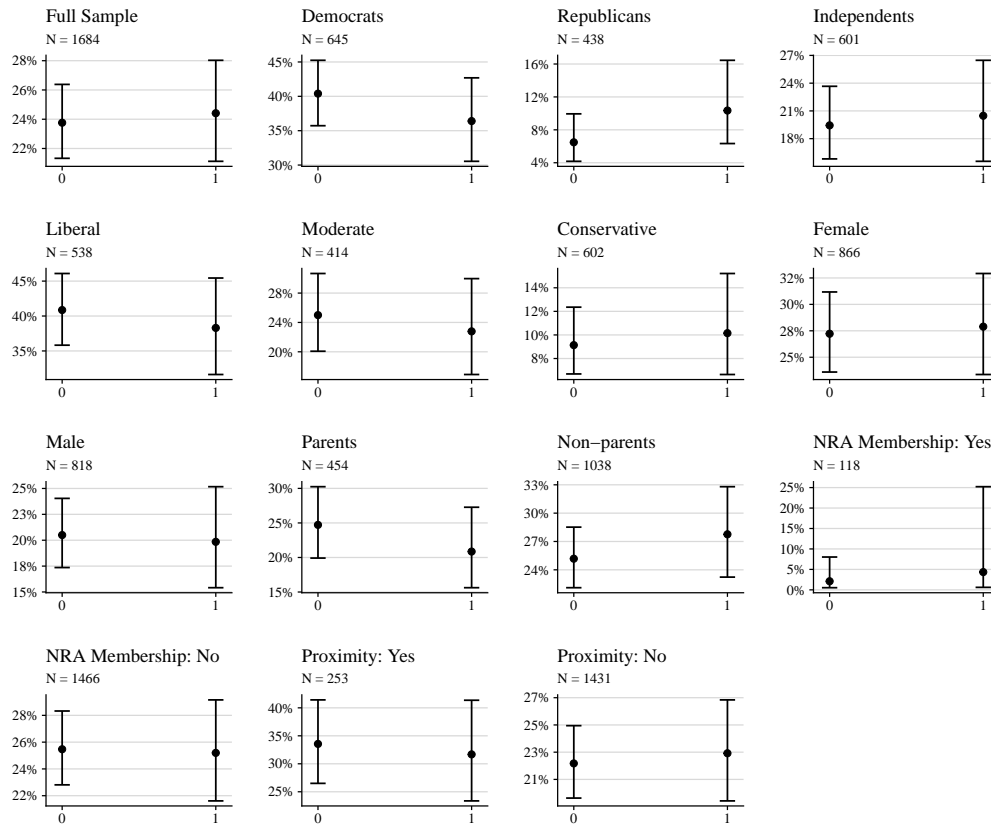

Figure 1 Caption

Note

Table 1 Effect of the Sandy Hook Shooting on Gun Control Support (5-points Likert Scale), Ordered Logit Results

	Estimate	Standard Error	<i>z</i> -statistic	<i>p</i> -value	<i>N</i>
Full Sample	1.144	0.091	1.475	0.140	1684
Democrats	0.892	0.145	-0.788	0.431	645
Republicans	1.524	0.200	2.109	0.035	438
Independents	1.169	0.154	1.013	0.311	601
Liberal	0.923	0.161	-0.496	0.620	538
Moderate	1.002	0.180	0.010	0.992	414
Conservative	1.495	0.168	2.388	0.017	602
Female	1.036	0.124	0.287	0.774	866
Male	1.174	0.137	1.169	0.242	818
Parents	1.019	0.170	0.110	0.912	454
Non-parents	1.148	0.119	1.160	0.246	1038
NRA Membership: Yes	0.830	0.812	-0.229	0.819	118
NRA Membership: No	1.083	0.098	0.820	0.412	1466
Proximity: Yes	1.079	0.226	0.336	0.737	253
Proximity: No	1.129	0.100	1.208	0.227	1431

Estimates (but not standard errors) exponentiated. Cut point estimates omitted.

Table 2 Effect of the Sandy Hook Shooting on Gun Control Support Conditional on Education

	Logit	Ordered Logit
Post-shooting (Yes = 1)	−0.50 (0.78)	−0.09 (0.57)
Education (No = 1, Doctorate = 15)	0.17*** (0.04)	0.12*** (0.03)
Post-shooting × Education	0.05 (0.07)	0.03 (0.05)
Constant	−3.07*** (0.46)	
τ , 1 2		0.90** (0.34)
τ , 2 3		1.91*** (0.35)
τ , 3 4		2.59*** (0.35)
τ , 4 5		3.47*** (0.35)
BIC	1842.03	5041.52
$\ln \mathcal{L}$	−906.17	−2494.78
N	1674	1674

τ denotes cut point. Standard errors in parentheses. *** $p < 0.001$; ** $p < 0.01$; * $p < 0.05$.

Table 3 Effect of the Sandy Hook Shooting on Gun Control Support (Binary), Cross-sectional Analysis

	Estimate	Standard Error	t -statistic	p -value	N
Full Sample	−0.004	0.033	−0.118	0.906	1684
Democrats	0.003	0.060	0.046	0.963	645
Republicans	0.010	0.039	0.269	0.788	438
Independents	−0.027	0.058	−0.466	0.641	601
Liberal	0.058	0.069	0.841	0.401	538
Moderate	−0.058	0.067	−0.870	0.385	414
Conservative	−0.060	0.040	−1.487	0.138	602
Female	0.003	0.046	0.071	0.943	866
Male	−0.014	0.046	−0.295	0.768	818
Parents	−0.085	0.054	−1.583	0.114	454
Non-parents	0.032	0.047	0.685	0.494	1038
NRA Membership: Yes	0.164	0.186	0.882	0.379	118
NRA Membership: No	−0.022	0.034	−0.650	0.516	1466
Proximity: Yes	−0.017	0.092	−0.182	0.856	253
Proximity: No	−0.006	0.034	−0.176	0.860	1431

It replicates the numerical results underlying the left panel of Figure 2 in RT.

Standard errors are heteroskedasticity-robust.

Table 4 Effect of the Sandy Hook Shooting on Gun Control Support (Binary), Panel (First-difference) Analysis

	Estimate	Standard Error	<i>t</i> -statistic	<i>p</i> -value	<i>N</i>
Full Sample	−0.039	0.023	−1.718	0.086	1066
Democrats	−0.051	0.041	−1.257	0.210	394
Republicans	0.032	0.029	1.097	0.274	289
Independents	−0.084	0.042	−2.004	0.046	383
Liberal	−0.082	0.027	−3.079	0.002	343
Moderate	0.010	0.045	0.220	0.826	252
Conservative	−0.072	0.035	−2.045	0.042	398
Female	−0.060	0.033	−1.833	0.067	515
Male	−0.018	0.032	−0.558	0.577	551
Parents	0.011	0.051	0.216	0.829	259
Non-parents	−0.084	0.025	−3.377	0.001	691
NRA Membership: Yes	−0.050	0.052	−0.954	0.343	95
NRA Membership: No	−0.036	0.026	−1.407	0.160	942
Proximity: Yes	−0.046	0.028	−1.667	0.098	150
Proximity: No	−0.038	0.027	−1.409	0.159	916

It replicates the numerical results underlying the right panel of Figure 2 in RT.

Standard errors are heteroskedasticity-robust.

Table 5 Effect of the Sandy Hook Shooting on Gun Control Support (5-points Likert Scale), Cross-sectional Analysis

	Estimate	Standard Error	<i>t</i> -statistic	<i>p</i> -value	<i>N</i>
Full Sample	0.052	0.105	0.499	0.618	1684
Democrats	−0.050	0.189	−0.263	0.793	645
Republicans	0.150	0.135	1.107	0.269	438
Independents	0.041	0.180	0.227	0.820	601
Liberal	0.021	0.216	0.096	0.924	538
Moderate	0.029	0.206	0.143	0.887	414
Conservative	0.040	0.158	0.256	0.798	602
Female	−0.034	0.146	−0.231	0.817	866
Male	0.141	0.153	0.918	0.359	818
Parents	−0.225	0.184	−1.227	0.221	454
Non-parents	0.113	0.147	0.767	0.443	1038
NRA Membership: Yes	0.653	0.735	0.888	0.376	118
NRA Membership: No	−0.021	0.110	−0.189	0.850	1466
Proximity: Yes	−0.024	0.293	−0.081	0.935	253
Proximity: No	0.056	0.111	0.510	0.610	1431

It replicates the numerical results underlying the left panel of Figure A.1 in RT.

Standard errors are heteroskedasticity-robust.

Table 6 Effect of the Sandy Hook Shooting on Gun Control Support (5-points Likert Scale), Panel (First-difference) Analysis

	Estimate	Standard Error	<i>t</i> -statistic	<i>p</i> -value	<i>N</i>
Full Sample	−0.110	0.055	−2.006	0.045	1066
Democrats	−0.113	0.073	−1.565	0.118	394
Republicans	0.028	0.074	0.377	0.706	289
Independents	−0.213	0.115	−1.850	0.065	383
Liberal	−0.147	0.070	−2.115	0.035	343
Moderate	−0.017	0.090	−0.185	0.853	252
Conservative	−0.195	0.098	−2.000	0.046	398
Female	−0.193	0.073	−2.658	0.008	515
Male	−0.024	0.081	−0.298	0.766	551
Parents	−0.012	0.099	−0.123	0.902	259
Non-parents	−0.225	0.072	−3.138	0.002	691
NRA Membership: Yes	−0.226	0.210	−1.076	0.285	95
NRA Membership: No	−0.109	0.057	−1.914	0.056	942
Proximity: Yes	−0.014	0.099	−0.145	0.885	150
Proximity: No	−0.129	0.062	−2.068	0.039	916

It replicates the numerical results underlying the right panel of Figure A.1 in RT.

Standard errors are heteroskedasticity-robust.

Table 7 Effect of the Sandy Hook shooting on Gun Control Support Polarization

	Estimate	Standard Error	<i>t</i> -statistic	<i>p</i> -value	<i>N</i>
Supporters vs Opponents	−1.118	0.146	−7.675	0.000	920
Democrats vs Republicans	−0.141	0.104	−1.365	0.173	1065
Liberal vs Conservative	0.048	0.120	0.400	0.689	1064

It replicates the numerical results underlying Figure 3 in RT.

We do not discuss this table in the main text. See RT for more details.
